

Any liquids or semi-solids... especially viscous materials can be mixed better and faster with

Use it to mix:

adhesives, cement, chemicals, ceramics, coatings, epoxies, foods, foams, glues, hi-viscosity liquids, mortar, paint, pharmaceuticals, polyester gelcoats, resins, sheetrock mud, slurry, zinc rich materials or any other "tough to mix" materials.

All Purpose, Heavy Duty, Efficient

It is a true mixer, not a stirrer. The two vertical blades confine the mixing action within the mixing head while the horizontal opposed blades force material from the upper and lower areas of the container inside the head. The leading edge of the lower horizontal blade will scrape the bottom of the container to bring all settled particles into the head. The ring prevents damage to the blades and puncturing of container walls.

Fits All 1/4" - 3/4" Power Tools

Jiffy Mixers operate with both electric and air-driven chucked power tools. Tools with 450-750 give the best rate of thorough mixing. Permanent installation can be easily accomplished.

Cuts mixing time up to 90%
Won't splash
Won't suck air
Unconditionally guaranteed

Stainless Steel 304

MODEL	Shaft Length in. mm	Container Size	Top Diameter in. mm	Bottom Diameter in. mm	Depth of Head in. mm	Shaft Diameter in. mm
